WHORES FOR GLORIA William T. Vollmann, 2013-01-02 With his first three works of fiction—the novels *You Bright and Risen Angels* and *The Ice-Shirt*, and the collection *The Rainbow Stories*—William T. Vollmann announced himself as a writer of rare and ferocious talent, with critics comparing him to William Burroughs, Thomas Pynchon, and T.C. Boyle. His new

novel is the story of Jimmy, who has been deserted by his lover, a prostitute by the name of Gloria. In the despair of his loneliness, and his drunken grief, he reassembles Gloria's presence out of whatever he can buy from the hookers on the street—the fragments of their lives and dreams, and locks of hair they are willing to share for a price. In his search for these snatches of intimacy he meets the hustlers, drunks, and prostitutes of San Francisco's Tenderloin district: Candy, who beats her customers when they ask for it but refuses to let them call her a bitch; Snake, who pimps his wife; Nicole, whose job it is to give men AIDS; Jack, who shoots his woman's earnings into his arm but still likes Chopin even though he doesn't have a record player; and Gloria, who may or may not be a figment of Jimmy's imagination. Vollmann writes with explosive power of the inner city, unflinching in the way he confronts the solitude of the homeless and unloved, the insulted and the injured of skid-row America. His exhilarating, high-voltage style and lyric language touch the heart and retrieve a jubilant integrity from the harsh struggles of his characters. Here is a world of harrowing truth, beautifully expressed by a writer of prodigious gifts.

How and Why to Read and Create Children's Digital Books Natalia Kucirkova, 2018-12-03 *How and Why to Read and Create Children's Digital Books* outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. *How and Why to Read and Create Children's Digital Books* is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for *How and Why to Read and Create Children's Digital Books* 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University
